

L.H. Dottie

CELEBRATING SIXTY YEARS

Our Story

Family-owned and operated since 1965, Dottie is now led by its fourth generation of leadership, carrying forward a legacy built on integrity, innovation, and dedication. For over 60 years, we've stayed true to our vision: to deliver exceptional service, uncompromising quality, and innovative products that professionals can rely on.

What began in a modest Los Angeles warehouse has grown into a nationwide brand, with strategically located distribution centers in Oklahoma City and Philadelphia allowing us to serve customers across North America. And while much has changed over the years, one thing never has: our commitment to building outstanding products and lasting customer relationships. We continue to treat every customer as we did our very first—with attentive, personalized service every step of the way.

Bigger Family. Better Products.

With thousands of stocked items and made-to-order products backed by full technical data and certifications, we are built to serve professionals who demand more.

Values We Believe In

Simplicity

Partnerships should simplify, not complicate. With our descriptive part numbering system, streamlined ordering processes, and always-available staff, we work diligently to make your day-to-day operations efficient.

Uncompromising Standards

Everything we produce is manufactured in strict adherence to industry standards. We pride ourselves on keen attention to detail.

Exceptional Service

We make our most critical decisions guided by the demands of industry professionals, and we don't stop until our solutions exceed your expectations. With superior distribution and unrivaled stock levels, we're leading the industry in customer satisfaction.

PACKAGING

The Invincibox® is where innovation meets real-world demands. The patent-pending design features a reinforced heavy-duty snap-tight hinge that guarantees a secure and reliable closure, keeping products protected even in demanding conditions. Engineered for repeated use, this strengthened hinge delivers exceptional durability and long-lasting performance, setting the Invincibox® apart from ordinary packaging solutions.

Patented Invincibox® Design

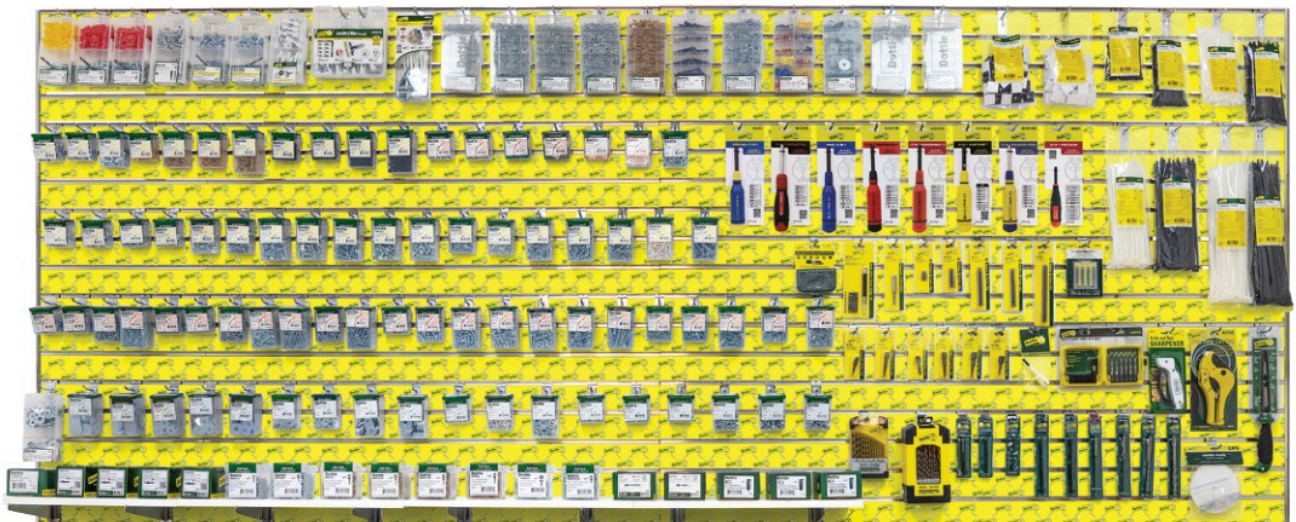

Invincibox Color Coded Labeling System

Sheet Metal Self Drilling Drywall Wood Screws	Hex Nuts Washers
Machine Screws	Stainless Steel
Anchors Screw Kits Wire Goods	

A collapsible hang tab provides flexible display options, whether on slatwall systems or on Dottie's modular merchandising displays. The color-coded labeling system and clear, see-through packaging ensures products remain organized and easy to identify, allowing professionals to locate the right items quickly and more efficiently. From the Invincibox® to the Tuff Pack and Tuff Pail, our premium lineup of packaging solutions are designed to handle products and projects of every shape and size, delivering security and organization.

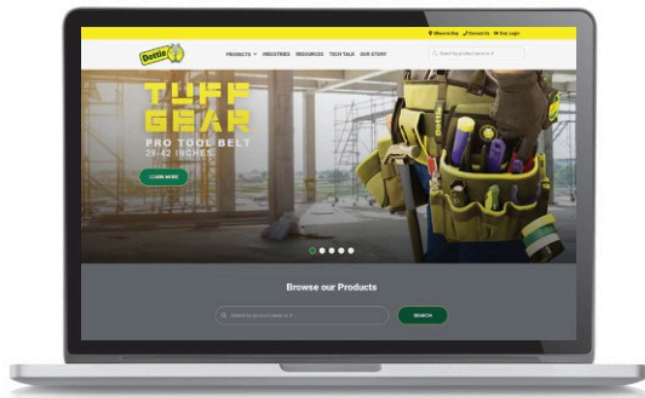

DISPLAYS

Maximize product organization with our modular self-fed gravity display. This versatile merchandising solution keeps your products neatly arranged in one convenient location making it easy for professionals to find what they need, when they need it.

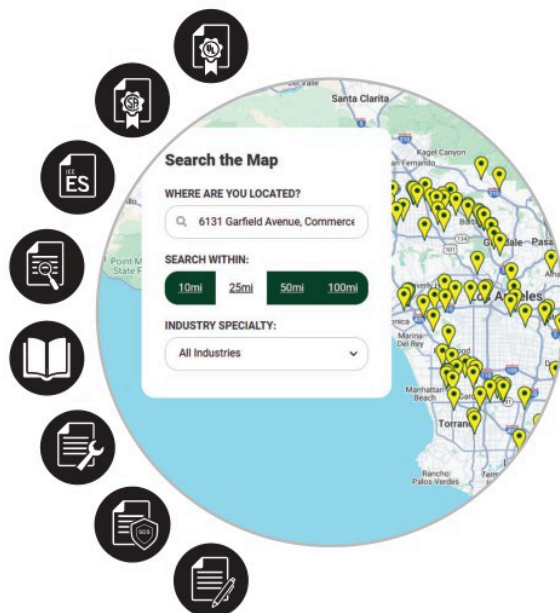

TECHNOLOGY

At Dottie, we believe technology should simplify, streamline, and enhance your experience. That's why we've invested in EDI integration, business intelligence tools, distributor portal, e-commerce integration, and warehouse automation, to ensure faster order processing, real-time insights, and a smoother experience from click to delivery. Innovation isn't just in our products—it's in the way we serve you.

Website

We designed our digital experience with one goal in mind: to help contractors and wholesalers get the information they need—fast, accurately, and without hassle. Every product page includes dynamic spec sheets, certificates of conformance, technical data sheets, UL listings, and SDS documents. Dottie's intuitive Submittal Generator lets users build custom product mixes in seconds. And with our "Where to Buy" tool, powered by Google Maps API, finding and navigating to your nearest stocking distributor is quick and effortless.

EDI and E-Commerce

In today's fast-paced business environment, timing is everything. That's why we support both EDI and web store ordering system, allowing distributor orders to flow directly into our system with minimal intervention. This reduces errors, speeds up fulfillment, and ensures our team can receive, pack, and ship your orders with maximum efficiency.

TUFF PACK

P TUFF PAIL

Truss Head Machine Screws

Phillips/Slotted Truss Head Machine Screws are used in tapped holes or with nuts to join assemblies. Their wide, rounded head provides a larger bearing surface, distributing the load evenly and protecting the surface from damage.

Stainless Steel Phillips Pan Head Machine Screws

Stainless Steel Phillips Pan Head Machine Screws resist chemicals, moisture, and extreme temperatures. Ideal for joining assemblies, their Phillips drive ensures self-centering and stability, while the rounded head offers even force distribution and allows for easy removal.

FASTENERS & HARDWARE

SCREWS

Hex Washer Head Sheet Metal Screws

Hex Washer Head Sheet Metal Screws are versatile fasteners with sharp, spaced threads that tap their own internal threads, making them ideal for fastening light metal, wood, and plastic. The hex head offers a larger surface area for improved torque and grip, ensuring easier and more secure installation, especially in high-torque applications.

High Hex Head Self Drilling Screws

High Hex Head Self Drilling Screws offer fast installation without pre-drilling, ideal for metal-to-metal applications. The higher head ensures secure placement in the driver for added stability, while serrations under the head prevent over-torquing. The extra-wide serrated washer minimizes walking and stripping for reliable performance.

Self Drilling #5 Point Screws

Self Drilling #5 Point Screws, featuring a longer drilling tip, easily penetrate thicker metal compared to other drill points. They offer fast, one-step installation by drilling, tapping, and fastening in a single operation, making them ideal for metal-to-metal applications. They are also available in extreme weather-resistant coatings for harsh conditions.

FASTENERS & HARDWARE

SCREWS

Drywall Screws

Drywall Screws are available in both coarse and fine thread options, designed for fastening drywall to either wood framing or 20-25 gauge steel. Coarse thread screws feature a single lead point and widely spaced threads for a strong hold in wood, while fine thread screws have a sharp, self-piercing point and tightly spaced threads for secure fastening to steel. Both types include a countersunk bugle head that tapers smoothly into the drywall for a clean, professional finish.

Wood Screws

Wood Screws feature an aggressive thread design for enhanced grip strength, making them ideal for materials like plywood, lumber, and other woods. Their countersunk head ensures a flush finish after installation. Available in carbon steel or solid brass, they offer corrosion resistance when needed. For best results and to prevent splitting, it's recommended to drill a pilot hole slightly smaller than the screw's diameter.

Lag Screws

Lag Screws are heavy-duty fasteners designed to connect heavy lumber or materials that bear a strenuous load. They can be used with lag shields for masonry applications such as concrete, brick, and mortar. Ideal for situations where standard wood screws are too short or small, Lag Screws may require a pilot hole in some cases to prevent splitting or snapping.

BOLTS

Hex Head Tap Bolts

Hex Head Tap Bolts are versatile fasteners that can be threaded into internally tapped holes or paired with a nut to secure assemblies over longer distances. In adjustment applications, they can be used with hex nuts to lock the assembly in place. Available in low carbon steel, stainless steel, and silicon bronze for various durability and corrosion-resistant needs.

Grade 5 Hex Head Cap Screws

Grade 5 Hex Head Cap Screws are used in applications where medium strength is necessary, typically those where controlled clamp force and high loads are required. These screws can be screwed into internally tapped holes or used with a nut. They should always be used with a hardened washer under the turned component.

FASTENERS & HARDWARE

NUTS | WASHERS

Hex Nuts

Hex Nuts are used with bolts, screws, and other threaded components to securely join materials. Available in various materials such as carbon steel, stainless steel, solid brass, silicon bronze, and Grade 5 carbon steel. Other options include machine screw hex nuts for smaller fasteners and specific uses.

Flat Washers

Flat Washers increase the surface area of fasteners, distributing force evenly to prevent surface damage and loosening from vibration. They also serve as spacers and provide a reliable bearing surface to prevent bolts and screws from pulling through materials. Available in steel, stainless steel, hard alloy, brass, and silicon bronze.

Fender Washers

Fender Washers feature an extra wide outside diameter compared to standard flat washers, providing superior load distribution across larger surface areas. This makes them ideal for reinforcing oversized or irregular holes, preventing fasteners from pulling through materials, and serving as effective spacers. Commonly used in sheet metal and general construction applications. Available in carbon steel and stainless steel.

Lock Washers

Lock Washers are manufactured with a trapezoidal cross section that deflects under load and can be used with or without a hardened flat washer. They provide marginal resistance to vibration loosening and are ideal in applications where fasteners have a tendency to rotate or lose friction. Available in spring steel, stainless steel, and silicon bronze.

FASTENERS & HARDWARE

FIXTURE ACCESSORIES

Threaded Rod

Threaded Rod connects, supports, or braces metal, concrete, and wood structures, offering a secure fastening solution. It's commonly used to suspend fixtures, strut, or conduit from ceilings and is available in 6-foot and 10-foot lengths, in both carbon steel and stainless steel.

Zinc Plated Steel

Jack Chain

Chain is available in both Double Loop and Jack Chain versions. Both are lightweight, weldless chains made from thin wire, with Double Loop featuring standard links and Jack Chain formed in figure-eight-shaped links. Ideal for hanging signs and lighting fixtures where high strength isn't needed, they come with a bright galvanized coating for added durability.

Screw Eyes

Screw Eyes feature a closed circular eye on one end and a gimlet point lag screw on the other, making them perfect for attaching cables and ropes to surfaces. For best results, use a pilot hole slightly smaller than the screw diameter to avoid splitting or snapping.

ANCHORS & KITS

LIGHT-DUTY ANCHORS

Zamac Alloy Wall Driller

The Wall Driller Anchor features a fine-centered point that guides it smoothly into drywall without the need for pre-drilling. The reusable anchor can be easily installed with either a manual or power screwdriver. Not recommended for overhead use.

Part Number	Material	Standard Qty	Sleeve Qty	Master Qty
WD6	Zamac Alloy	100	500	3000
WD8	Zamac Alloy	100		1000

Wing Conical Plastic Anchors

The Wing Conical Plastic Anchor is manufactured via injection molding and is designed to be used in conjunction with a sheet metal or wood screw. It can be used in solid and hollow wall applications and in concrete, block, or brick. The anchor has a lip to prevent falling into deep holes or hollow walls and is not recommended for use overhead or in applications where holding values are critical.

Part Number	Screw Size	Anchor Length	Standard Qty	Sleeve Qty	Master Qty
121	#4-#6-#8	1"	100	500	4000
122	#8-#10-#12	1-1/4"	100	500	3000
123	#12-#14-#16	1-1/2"	50	250	1500

Nylon Wall Driller

The Nylon Wall Driller Anchor features a fine-centered point that smoothly guides it into drywall without pre-drilling. The reusable anchor can be easily installed with a manual or power screwdriver. Made from nylon, it is also safe for use in conductive environments, offering added versatility. Not recommended for overhead use.

Part Number	Material	Standard Qty	Sleeve Qty	Master Qty
WD6N	Nylon	100	500	3000
WD8N	Nylon	100		1000

Conical Plastic Anchors

Conical Plastic Anchors are manufactured via injection molding and are designed to be used in conjunction with a sheet metal or wood screw. They can be used in solid and hollow wall applications and in concrete, block, or brick. These anchors have a lip to prevent falling into deep holes or hollow walls and are not recommended for use overhead or in applications where holding values are critical.

Part Number	Screw Size	Anchor Length	Standard Qty	Sleeve Qty	Master Qty

23	#12-#14-#16	1-1/2"	50	250	1500

Multi Grip Plastic Anchors

The Multi Grip Plastic Anchor is designed with two expandable wings that grip behind the drywall for maximum holding power. It features advanced cam action technology that expands to create additional pressure against the substrate, helping provide more stability. These anchors are not recommended for use overhead or where holding values are critical. Suitable materials for use include drywall, block, brick, and masonry.

Part Number	Screw Size	Anchor Length	Standard Qty	Sleeve Qty	Master Qty

Nylon Toggle Anchors

Designed for drywall and solid wall applications, Nylon Toggle Anchors securely anchor objects with a small pilot hole. In hollow walls, the wings expand for a stronger hold and higher pull-out load. Complete installation with a drywall or sheet metal screw. Not recommended for overhead use or high-stress applications.

Part Number	Screw Size	Pre-Drill Size	Standard Qty	Master Qty
NT14L	#8 x 1-1/2"	1/4"	100	1000
NT38L	#10 x 1-1/2"	3/8"	100	1000

Wall Grip Anchors

Wall Grip Anchors, also known as Mollys or Molly Bolts, are manufactured and designed for use in hollow wall installations. When tightened, the body pulls up to enable the anchor to secure itself to thin walls such as paneling and hollow doors. These are length-specific anchors. They are installed using the provided machine screw or with a special puller.

Part Number	Anchor Dia.	Grip Range	Standard Qty	Master Qty
WG18S	1/8"	1/8" to 1/2"	100	1000
WG18L	1/8"	5/8" to 7/8"	100	1000

Wall Drive Anchors

Wall Drive Anchors are manufactured and designed for use in hollow wall installations. When tightened, the body pulls up to enable the anchor to secure itself to thin walls such as paneling and hollow doors. These are length-specific anchors. They are installed using the provided machine screw or with a special puller.

Part Number	Grip Range	Standard Qty	Master Qty
18SD	1/8" to 1/2"	100	1000
18SLD	1/8" to 1-3/16"	100	1000

Zamac Alloy Anchors

Zamac Alloy Anchors are impact-set anchors made from a corrosion-resistant Zamac alloy. They are designed for use in concrete, block, brick, or stone and are available in two installation styles: a removable Philips-drive version and a tamper-resistant model. These anchors are installed by striking or driving the pre-mounted pin into place, creating a secure hold in solid materials. They are not recommended for overhead use or where holding values are critical.

Toggle Bolts

Toggle Bolts are light- to medium-duty anchors designed for hollow materials such as wallboard, plaster, plywood, and hollow block. When expanded behind the wall, the wing opens, increasing the contact surface area and distributing the load for improved weight support. The maximum weight a Toggle Bolt can hold depends on bolt size and wall thickness. Installation requires a larger hole than other hollow wall anchors, allowing the toggle to open fully and secure the fastened object effectively.

Concrete Screw Anchors

Concrete Screw Anchors are tempered masonry screws engineered for durability and superior holding strength. With a unique thread design, these screws are perfect for light- to medium-duty applications in concrete, masonry, brick, and wood. The gimlet point allows for self-tapping while drilling. Common uses include attaching electrical boxes, light fixtures, and masonry materials.

Wall Twister Kits

WALL TWISTER®

The Wall Twister® is an all-steel, single-piece screw anchor with a unique deep-cutting thread, ideal for fastening into drywall, wood, concrete, plaster, brick, and block. Patented reverse serrations under the head prevent over-torquing. For masonry, use the included 3/16" carbide-tipped drill bit for a pilot hole, while drywall and wood require no pre-drilling. Common applications include HVAC fixtures, signs, telecom equipment, and plumbing fixtures.

Concrete Screw Bolts

MEGABOLT™

The Mega-Bolt Concrete Screw Bolt is a zinc plated, heavy-duty, single-piece anchor built for quick installation, full removability, and easy identification on the job. Its unique thread design minimizes required torque, boosting productivity and eliminating the need for multiple tools—drill the hole, then simply use a socket driver with any impact or torque wrench. Steel threads along the shaft tap securely into material, ensuring deep thread engagement for reliable load transfer. Reverse serrated teeth on the hex washer head help secure the fixture and prevent over-torquing for a strong, dependable hold every time. For cracked and uncracked concrete. ICC-ESR certified.

Mini Drop-In Anchors

Mini Drop-In Anchors are manufactured with an internally threaded, zinc plated, all-steel exterior shell that features an expansion cone insert used to anchor into concrete base materials. They are intended to be used in shallow embedment applications and can be used with any head style screw. The screw can easily be removed, loosened, or retightened if needed.

ATM38	3/8"	1

Threaded Rod Spikes

The Threaded Rod Spike is zinc plated and designed for suspending threaded rod from concrete ceilings in lightweight applications. A unique manufacturing process creates an S-shaped configuration at the working end, forming an expansion mechanism. As the anchor is driven into the hole, this mechanism compresses and flexes to fit securely.

HANGING SYSTEMS INSTALLATION TOOLS

Metal Rod Hangers

Metal Rod Hangers are designed for overhead applications where threaded rod needs to be suspended into structures involving metal joists and beams. These zinc plated, carbon steel fasteners are manufactured with a self-drilling tip that requires no pre-drilling and can easily be installed with a drill or screw gun. For proper installation and weight load data, reference the technical data sheet.

Side Mount

Part Number	Rod Size	Shank Length	Self-Drilling Range	Standard Qty	Master Qty
SSM14S	1/4"	1"	0.036" to 0.188"	100	600

Bottom Mount

SSM14B	1/4"	1"	0.036" to 0.188"	100	600
SSM38BR	3/8"	1-1/2"	0.036" to 0.188"	100	500
SSM12BR	1/2"	1-1/2"	0.188" to 0.500"	100	500

Wood Rod Hangers

Wood Rod Hangers are zinc plated, carbon steel fasteners designed for suspending threaded rod in overhead applications in wood frame columns and beams. Featuring a type-17 tip, they allow for easy installation in wood. Common applications include electrical conduit and cable trays, pipe hanging, fire protection, and HVAC equipment suspension. For installation guidelines and weight load information, please refer to the technical data sheet.

Side Mount

Part Number	Rod Size	Shank Length	Standard Qty	Master Qty

SSW12B	1/2"	2-1/2"	100	300

Concrete Rod Hangers

Concrete Rod Hangers are zinc plated, carbon steel screw anchors designed for suspending threaded rod in concrete slabs, beams, or concrete-over-metal structures. These robust, self-tapping anchors feature deep-cutting threads for low installation torque. They are ideal for securing electrical conduit, cable trays, pipe hanging, fire protection, and HVAC equipment. Refer to the technical data sheet for installation guidelines and weight load details.

Part Number	Rod Size	Shank Length	Standard Qty	Master Qty
SSC14B	1/4"	1-1/4"	100	600
SSC38B	3/8"	1-1/2"	100	600
SSC12B	1/2"	2-3/4"	50	250

Dual Rod Hangers

Dual Rod Hangers are zinc-plated, carbon steel, single-piece anchors with threaded heads on both ends and sides, enabling installation in both vertical and horizontal orientations. Designed for use with threaded rod systems, eye bolts, and more, they are suitable for applications in both metal and wood.

CWC12	12	12'	100	

Machine Screw Anchors

Machine Screw Anchors are versatile anchors suitable for various concrete strengths and can also be used in brick, block, or stone. They adapt well to slight hole-size variations and allow for easy removal, loosening, and retightening. Compatible with any screw head style, these anchors are not recommended for overhead use or applications requiring high holding strength.

DLMPHD	Replacement Part for Telescoping Pole Tool	1

Lag Shields

Lag Shields are two-piece die-cast anchors designed for lag screws in materials like mortar joints, poured concrete, brick, and concrete blocks. They install easily with finger pressure or light taps after drilling. Available in short and long lengths, the short style suits harder masonry for reduced drilling time, while the long style provides added strength in softer materials.

Long Lag Shield

Double Expansion Anchors

Double Expansion Anchors are designed for anchoring into concrete, brick, or block base material. Inserting a machine-threaded bolt into the anchor expands it against the concrete at two points. These anchors are made from Zamac, a non-rusting material. They are intended to be set flush with the base material and are considered a light- to medium-duty fastener.

ANCHORS & KITS

ANCHOR KITS

Conical Anchor Kits

Conical Anchors are versatile fasteners designed for use in solid and hollow wall materials like concrete, block, brick, drywall, and plywood. A built-in lip prevents the anchor from falling into deep holes or hollow spaces. For solid surfaces, match the anchor size to the hole for optimal installation, while in softer materials, use the smallest hole for a snug fit. Not recommended for overhead or high-holding-value applications.

Multi Grip Anchor Kits

The Multi Grip Anchor is designed with two expandable wings that grip behind the drywall for maximum holding power. It features advanced cam action technology that expands to create additional pressure against the substrate, helping provide more stability. These anchors are not recommended for use overhead or where holding values are critical. Suitable materials for use include drywall, block, brick, and masonry.

Washer Kits

Assorted Washer Kits offer a convenient solution for storing, organizing, and transporting a variety of washers, perfect for everyday applications.

Part Number	Washer Type	Standard Qty	Master Qty
350 Pc: (100) #8, (100) #10, (75) 1/4", (20) 5/16", (50) 3/8", (5) 1/2"			
FW2	Flat Washer	1	10
120 Pc: (40) 3/16" x 1-1/4", (40) 1/4" x 1-1/4", (40) 3/8" x 1-1/4"			
FENWK	Fender Washer	1	6
415 Pc: (100) #8, (100) #10, (100) 1/4", (50) 5/16", (40) 3/8", (25) 1/2"			
LWK	Lock Washer	1	6

Hex Nut Kit

The Hex Nut Kit includes an assortment of zinc-plated, carbon steel hex nuts in 10 different sizes, ranging from #6 machine screw nuts to 5/8" hex nuts. These nuts are designed for use with bolts, screws, studs, threaded rod, and other fasteners with machine screw threads.

Part Number	Standard Qty	Master Qty
339 Pc: (50) #6-32, (50) #8-32, (50) #10-24, (25) 10-32, (25) #12-24, (75) 1/4", (25) 5/16", (30) 3/8", (6) 1/2", (3) 5/8"		
339	1	6

250 pc Terminal Kit

The Terminal Kit is an assortment of the most popular vinyl-insulated terminals for secure wire connection. It features a variety of butt splices and ring/spade terminals. It accommodates wire ranges from 22 to 10 AWG and is rated at 600 volts.

Part Number	Standard Qty	Master Qty
250 Pc: Butt Connectors: (25)RED 22-18, (25)BLU 16-14, (15)YEL 12-10; Rings (20)RED #6 22-18, (25)RED #10 22-18, (20)BLU #6 16-14, (25)BLU #10 16-14, (15)YEL #10 12-10; Spades: (20)RED #6 22-18, (20)BLU #6 16-14, (25)BLU #10 16-14, (15)YEL #10 12-10

Phillips/Slotted Round Head Machine Screw, Hex Nut, & Lock Washer Kit

The Machine Screw, Hex Nut, & Lock Washer Kit is a convenient assortment of Phillips/Slotted Round Head Machine Screws, Hex Nuts, and Lock Washers. Ideal for fastening in machines, tools, appliances, and more. The kit includes 15 different sizes of essential hardware, neatly organized in a 12-compartment box for easy access and storage.

Part Number	Standard Qty	Master Qty
435 Pc: Round Head Machine Screws: #6-32 (1", 1-1/2", 2"), #8-32 (1", 1-1/2", 2"), #10-32 (1", 1-1/2", 2"), Hex Nuts: #6-32, #8-32, #10-32, Lock Washers: #6, #8, #10		
SNWK	1	6

Metal Piercing Screw Kit

Sharpeez™

The Sharpeez Screw Kit includes six different sizes of metal piercing screws. They are made from zinc-plated carbon steel and feature sharp points that pierce thin sheet metal while forming their own mating threads. Each screw is equipped with a 1/4" hex head designed to resist stripping. These screws are ideal for sheet metal applications, HVAC work, plumbing, and electrical installations.

Part Number	Standard Qty	Master Qty
250 Pc: (50) #6 x 3/8", (50) #7 x 1/2", (50) #8 x 1/2", (50) #8 x 3/4", (25) #10 x 3/4", (25) #10 x 1"

FITTINGS & STAMPINGS

PLATES | STRAPS | STAPLES

Safety Plates

Safety Plates are available in a range of sizes and are crafted from 16-gauge steel. Designed for durability and protection, these plates are affixed to wooden studs to safeguard against nails, drills, or fasteners penetrating hidden utility pipes, wires, and cables.

Part Number	Width	Length	Gauge	Standard Qty	Master Qty
411	1-1/2"	2-3/4"	16	100	1000
P41P	1-1/2"	2-3/4"	16	500	
2516	1-3/4"	5"	16	100	
2520	1-3/4"	5"	20	100	
3516	3"	5"	16	100	

Plate Straps

Plate Straps are available in various gauges and lengths, designed to be nailed across studs to secure pipes in place. They also serve as a protective barrier by preventing utility pipes and electrical wires passing through wood studs from being damaged by drills, nails, or fasteners.

Part Number	Width	Length	Gauge	Standard Qty
12 Gauge				
PS129	1-1/2"	9"	12	50
PS1212	1-1/2"	12"	12	50
PS1218	1-1/2"	18"	12	50
PS1224	1-1/2"	24"	12	50
16 Gauge				
PS169	1-1/2"	9"	16	50
PS1612	1-1/2"	12"	16	50
PS1618	1-1/2"	18"	16	50
PS1624	1-1/2"	24"	16	50

Hook On Straps

Hook On Straps are designed to secure pipes or tubing running parallel to studs, ensuring stability and proper alignment.

Part Number	Length	Gauge	Standard Qty
5818	18"	14	100
5826	26"	14	100

Nail Straps

Nail Straps secure tubing, pipe, or EMT to mounting surfaces and are available in regular steel or dipped plastic coating. They are manufactured from carbon steel and zinc-plated for corrosion resistance.

Part Number	EMT Size	Pipe Size	Standard Qty	Master Qty
D1	3/4"	1/2"	100	1000
D2	3/4"	1"	100	1000
D3	1"	3/4"	100	1000
D11	1/2"		100	1000
D12	3/4"	1/2"	100	1000
D13	1"	3/4"	100	1000

Plastic Coated

Part Number	Size	Standard Qty	Master Qty
PL30	1"	50	500
PL40	1-1/4"	50	500

Plastic Coated Pipe & Tube Hanger

Plastic Coated Hangers are designed to securely fasten pipes or tubing as they traverse wooden beams.

Part Number	Size	Gauge	Standard Qty
PC346	3/4" x 6"	10	100

Plumber's Tape

Plumber's Tape is available in various lengths, gauges, and material compositions. It is a flexible, perforated metal tape that is commonly used to hang, strap, or secure pipes, conduit, tubing, and ductwork to a working surface.

Galvanized Carbon Steel

Part Number	Size	Gauge	Standard Qty	Master Qty
PT28	3/4" x 10'	28	50	50
PT26	3/4" x 10'	26	50	50
PT22	3/4" x 10'	22	50	50

Solid Copper

Part Number	Size	Gauge	Standard Qty	Master Qty
CU10	3/4" x 10'	23	1	50
CU25	3/4" x 25'	23	1	30
CU50	3/4" x 50'	23	1	15

Staples

Non-Metallic Cable Staples are used to fasten cables to wooden studs, ensuring secure installation and organized cable management. They are manufactured from low carbon steel and zinc-plated for corrosion resistance.

Part Number	Length	Width	Cable Size	Gauge	Standard Qty	Master Qty
RX501	1"	1/2"	14/2, 12/2	12	100	5000

Underwriters Laboratory (UL Listed) File No: E197370. Refer to official UL listings for applicable product sizes and specifications.

Black Annealed Steel Tie Wire

Black Annealed Steel Tie Wire is a 16.5-gauge pliable metal wire intended to secure PVC conduit in trenches before pouring concrete. It is also used in drop ceiling applications and in securing rebar.

Part Number	Length	Finish	Gauge	Standard Qty
TY164	400'	Black Annealed	16.5	12

Galvanized Steel Tie Wire

Galvanized Steel Tie Wire is a 16.5-gauge pliable metal wire intended to secure PVC conduit in trenches before pouring concrete. It is also used in drop ceiling applications and in securing rebar.

Part Number	Length	Finish	Gauge	Standard Qty
VTYG	400'	Galvanized	16.5	12

Switch Box Supports

Switch Box Supports secure electrical switch boxes in walls made of drywall or plaster. They are often used when there is no support structure, such as when installing an outlet box in drywall.

Part Number	Standard Qty	Master Qty
SBS165	100	500

Spider Plates

Spider Plates are a universal mounting plate that allows fixtures to be mounted to a 3" or 4" round box regardless of screw hole location.

Part Number	Size	Standard Qty	Master Qty
SP34	3-1/4" - 4"	20	200

Ceiling Cover Plates

Ceiling Cover Plates provide a clean, finished look by concealing unused ceiling outlet boxes. Constructed of durable steel with a white powder coated finish, they blend seamlessly with most ceilings. Each plate includes an adjustable mounting strap and screws, fitting both 3" and 4" outlet boxes for easy installation. Ideal for electrical remodels, renovations, or when fixture removal leaves exposed ceiling boxes.

Part Number	Size	Standard Qty	Master Qty
CP5	5-1/4"	1	50

FITTINGS & STAMPINGS

STRAPS | HANGERS | STRUT FITTINGS

One Hole Straps

One Hole Straps are used to fasten conduit to wood, masonry, and other working surfaces. They are manufactured from carbon steel and feature an inverted rib on the backside for increased rigidity. They are zinc-plated for increased corrosion resistance.

Strut Clamps

Strut Clamps are used to secure conduit to strut channel in overhead or wall mount applications. They are zinc plated for superior corrosion resistance and come preassembled with a keps nut and slotted hex head bolt.

Universal Offset Strut Straps

Offset Strut Straps provide a secure, universal method for fastening rigid, IMC, and EMT conduit to strut systems. Designed with an offset angle, they simplify both installation and removal in tight spaces. The captive thread design eliminates the need for a nut, ensuring quick and efficient installation. The patented design features beveled sides, and the center provides inverted rigidity.

Floor Flanges

Floor Flanges provide a strong and stable mounting base for securing pipe to floors, walls, or other flat surfaces. Constructed from durable malleable iron with a protective zinc finish, they resist rust and wear in demanding environments. They are manufactured with female threads to easily attach piping and are installed with 5/16" countersunk screws.

Pipe Supports

Pipe Supports are made from high-strength ABS/ASA polymers for exceptional strength and UV resistance. The dual-channel technology offers unmatched versatility, allowing strut clamps to attach to the large channel and conduit hangers or leveling systems to the small channel. With a load capacity of 130 lbs/in., it's ideal for rooftop applications like plumbing, HVAC, conduit, gas piping, and cable trays.

Post Bases

Post Bases are made with zinc plated steel and are designed to connect strut to structures, hardware, or other channels.

Part Number	Base Size	Number of Holes	Clevis Type	Standard Qty
SPB890	6" x 4"	8	Single Channel	10
SPB1045	6" x 6"	10	Single Channel	10
SPB1090	6" x 6"	10	Single Channel	10
SPB1245	6" x 6"	12	Double Channel	10
SPB1290	6" x 6"	12	Double Channel	10

Flat Plate Fittings

Flat Plate Fittings are made with zinc plated steel and create a splice joint by joining horizontal and vertical strut sections.

Part Number	Number of Holes	Standard Qty
SFP2	2	50
SFP3	3	50
SFP4	4	25
SFPC5	5	15
SFPL3	3	50
SFPT4	4	25

Angle Fittings

Angle Fittings are made with zinc plated steel and are used to connect metal framing channel and strut to structures, hardware, and other various materials at different angles.

Part Number	Angle	Number of Holes	Standard Qty
SAF290	90°	2	50
SAF390	90°	3	50
SAF490	90°	4	25
SAFU690	90°	6	15
SAF245	45°	2	50
SAF245C	45°	2	25
SAF445	45°	4	15
SAF445C	45°	4	25

U & Zee Fittings

U & Zee Fittings are made with zinc plated steel and are intended to be used with deep strut to connect strut channels to structures, hardware, and other channels at various angles.

U Fitting

Part Number	Type	Size	Standard Qty
SUFDS	Deep Strut	5-1/2" x 1-5/8" x 1-5/8"	15
SUFSS	Shallow Strut	5-1/2" x 1-5/8" x 1-3/16"	25

Zee Fitting

Part Number	Type	Size	Standard Qty
SZFDS	Deep Strut	3-3/4" x 1-5/8" x 1-5/8"	50
SZFSS	Shallow Strut	3-1/3" x 1-5/8" x 1-3/16"	50

Square Washers

Square Washers are made with zinc plated steel and are designed for connecting metal framing channels. Their larger surface area evenly distributes load, prevents bolts or screws from turning, and ensures a secure connection. Ideal for heavy-duty applications, they also act as shims to balance surface irregularities.

Part Number	Thread Size	Length	Width	Standard Qty
SQW14	1/4"	1/4"	1/4"	100
SQW516	5/16"	1-5/8"	1-5/8"	100
SQW38	3/8"	1-5/8"	1-5/8"	100
SQW50	1/2"	1-5/8"	1-5/8"	100
SQW58	5/8"	1-5/8"	1-5/8"	100

U-Bolt Beam Clamps

U-Bolt Beam Clamps are made with zinc plated steel and are used to secure channel beams in a strut assembly. They are manufactured from carbon steel and coated with an electroplated steel finish.

Part Number	Size	Standard Qty
SUB158	1-5/8"	25
SUB325	3-1/4"	25

FITTINGS & STAMPINGS

CONNECTORS | COUPLINGS

Weathertight Hubs

Weathertight Hubs are used to connect rigid conduit or IMC to a metal enclosure. They are manufactured with a non-corrosive zinc alloy hub that is suitable for indoor or outdoor use. They are rated water-tight and seal tightly to protect the conduit from moisture, oil, and dust.

Steel Snap-In Connectors

Steel Snap-In Connectors made of zinc plated steel, are designed to join one or two AC or MC cables into a single knockout in metal enclosures. The single-screw design ensures fast and easy securing—just insert the cable and tighten for a secure connection.

Part Number	Size	Type	Standard Qty	Master Qty
ACMC50	3/8"	FMC, AC, and MC	10	250
ACMC75	3/4"	FMC, AC, and MC	10	125
ACMC5075	1/2"	FMC, AC, and MC	10	125
ACMC52	1/2"	FMC, AC, and MC	10	125

Underwriters Laboratory (UL Listed) File No: E545098. Refer to official UL listings for applicable product sizes and specifications.

Angular Squeeze Connectors

Angular Squeeze Connectors are designed to secure and ground AC, MC, and FMC at an angle to metal enclosures and electrical boxes. The angled design ensures efficient cable routing in tight or confined spaces, minimizing strain on the wiring. Available in both insulated and non-insulated options, they feature a die cast zinc material coating that resists corrosion and are offered in various trade sizes to meet various needs.

Non-Insulated

Part Number	Size	Standard Qty	Master Qty
SQZA38	3/8"	50	500

Underwriters Laboratory (UL Listed) File No: E142707. Refer to official UL listings for applicable product sizes and specifications.

BX Connectors

BX Connectors are designed to terminate AC or MC cables into a 1/2-inch knockout. They accommodate steel 14/2-10/2 AC and 14/2-10/3 MC cables. Constructed from durable zinc die-cast material, they also feature a tri-combo screw for simplified installation.

Part Number	Cable Range	Standard Qty	Master Qty
BXC38	14/2-10/2 AC, 14/2-10/3 MC	100	1000

Underwriters Laboratory (UL Listed) File No: E545098. Refer to official UL listings for applicable product sizes and specifications.

Romex® Connectors

Romex® Connectors are designed to securely connect NMC cable to steel outlet boxes or metal enclosures. Made from durable zinc die-cast material, it offers reliable performance and corrosion resistance. Featuring two screws for a secure hold, this connector is ideal for use in dry, indoor applications.

Part Number	Cable Range	Standard Qty	Master Qty
ZRC38	14/2	100	1000
ZRC75	10/3 - 6/3	50	500
ZRC100	10/3 - 4/3	25	100
ZRC125	6/3 - 2/3	25	100

Underwriters Laboratory (UL Listed) File No: E142573. Refer to official UL listings for applicable product sizes and specifications.

Saddle Connectors

Saddle Connectors are made with durable zinc die-cast material and are made to terminate AC, MC, or NMC cables into a 1/2-inch knockout in dry location boxes or enclosures. The saddle clamp design ensures a firm, secure grip on the cable, preventing slippage and maintaining dependable electrical connections.

Part Number	Size	Standard Qty	Master Qty
SC38	3/8"	50	500

Underwriters Laboratory (UL Listed) File No: E545098. Refer to official UL listings for applicable product sizes and specifications.

Duplex Straight Squeeze Connector

The Duplex Squeeze Connector is made of non-corrosive die cast zinc and can be used in any dry location to connect two flexible metal conduit (FMC), armored cables (AC), or metal clad cables (MC) to a box or enclosure. The one-screw squeeze clamp provides a reliable electrical connection.

Part Number	Size	Standard Qty	Master Qty
ACMC38	3/8"	25	250

Underwriters Laboratory (UL Listed) File No: E142707. Refer to official UL listings for applicable product sizes and specifications.

FITTINGS & STAMPINGS

CONNECTORS | BUSHINGS

Cable Connectors

Cable Connectors are used to connect non-metallic sheathed cable to a steel outlet box or metal enclosure. It requires no tools for installation and easily snaps into a 1/2" or 3/4" knockout.

Wiring Device Spacers & Shims

The Wiring Device Spacers & Shims is crafted for multi-gang boxes, receptacles, and switches, ensuring electrical devices sit flush with drywall for a clean, professional finish. Made from non-conductive, durable, low-density polyethylene, each spacer strip features 8 foldable segments, allowing for precise and customizable 1/8-inch spacing to meet a wide range of installation needs.

361	Light Gray	40°F - 100°F	12	1	12

White Spray Chalk

White Spray Chalk features a special blend of raw materials that are safe on all surfaces and designed for temporary upside-down marking. Markings disappear in 10–20 days when exposed to water, traffic, and other abrasions. It can also be washed off with a pressure washer.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
215	White	50°F - 80°F	12	1	12

Gray Multi Purpose Primer

Gray Multi Purpose Primer is a non-lifting, high-quality coating designed for superior adhesion before applying topcoats. This quick-dry primer seals both porous and nonporous surfaces, ensuring a smooth, durable finish while protecting bare metal from rust and corrosion.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
Z8072	Gray	60°F - 85°F	12	1	12

Clear Coat Specialty Marking Paint

Clear Coat Specialty Marking Paint is a durable, upside-down clear coating designed to seal and protect construction chalk lines and temporary marks from wind, moisture, and traffic. It enhances colorfastness for markings and adheres to surfaces like pavement, gravel, and soil, ensuring lasting protection.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
200	Clear	40°F - 100°F	12	1	12

Marking Paint Applicator

The Marking Paint Applicator is built for professional-grade performance, combining comfort and durability. Its lightweight, one-handed design features an ergonomic trigger for easy operation, a non-slip rubberized grip, and a 34" reach for precision and ease. Equipped with a rubberized wheel, flag holder, and optional flag spike, it's ideal for dispensing paints to create lines, numbers, or words.

Part Number	Standard Qty
1245	1

Galvanize Coating

Galvanize Coating delivers permanent protection with pure zinc in the dry film. It meets MIL-P and DOD-P specs and withstands 2,000 hours of 5% salt spray (ASTM B-117). The light gray matte finish acts as a durable weld-through primer, offering protection equal to or better than hot-dipped galvanizing. Great for high-corrosion areas, marine use, manufacturing, washdown, and more, it ensures long-lasting durability.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
7007	Gray	50°F - 90°F	12	1	12
7008	Brite Metallic	50°F - 90°F	12	1	12

Epoxy Insulating Protective Coating

Epoxy Insulating Protective Coating is a tough, flexible coating designed to protect and insulate exposed wires and electrical windings, making it ideal for coils, transformers, and other electrical components. This air-drying formula hardens in one hour and offers a dielectric strength of up to 3,900 V/mil. With excellent adhesion, high arc resistance, and Class F thermal resistance, it outperforms lacquers and acrylics, allowing for motor heat expansion and contraction without chipping, peeling, or becoming brittle. Resistant to abrasion, oil, water, acids, and alkalis, it penetrates, coats, and seals in a single step.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
401	Red	50F° - 100°F	12	1	12

Insulating Varnish

This tough, flexible, oil-proof Insulating Varnish provides superior insulation with a Class F epoxy ester formula and a dielectric strength of 4,000 V/mil. It penetrates, coats, and seals in one step, with complete curing in 24 hours.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
6084	Red	60F° - 80°F	12	1	12

Off-Line Contact Cleaner

Off-Line Contact Cleaner is a quick-drying, low-odor solution designed for off-line equipment maintenance. It evaporates rapidly, leaving no film or residue, and is safe for use on most plastics and metals, ensuring effective and reliable cleaning.

Part Number	Color	Flammability	Sale Unit Qty	Standard Qty	Master Qty
8276	Clear	Extremely Flammable	12	1	12

Multi Purpose Wet Lubricant

Multi Purpose Wet Lubricant cleans, penetrates, lubricates, and protects with excellent moisture displacement and corrosion prevention. It penetrates deep into cracks and fasteners to loosen rust and scale. This silicone-free lubricant forms a clear, non-gummy film, creating a protective barrier against future damage. It sprays in any direction and provides superior protection for electronic, automotive, and industrial equipment.

Part Number	Color	Sale Unit Qty	Standard Qty	Master Qty
7340	Light Amber	12	1	12

Solvent Based Cutting Oil

Solvent Based Cutting Oil is a lubricant and coolant designed for industrial cutting operations. It reduces wear, ensures clean cuts, and works effectively on soft and hard metals. Ideal for latches, gear cutters, grinders, pipe threaders, and more. Not for use on electrical equipment or machinery in operation.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
7020	Light Brown	40F° - 110°F	12	1	12

Water Based Cutting Oil

Water Based Cutting Oil is a nonflammable, water-based cutting oil that enhances metal cutting and machining efficiency. It extends tool life, reduces sharpening and downtime, and lubricates while cooling. Suitable for all metals, including stainless steel, aluminum, brass, and copper. Ideal for sawing, tapping, grinding, machining, threading, and drilling. Not for use on electrical equipment or machinery in operation.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
890	Milky White	50F° - 90°F	12	1	12

Penetrating Oil

Penetrating Oil loosens rust and corrosion caused by alkali, fruit acids, water, and electrolysis, making disassembly of rusted parts quick and easy. With low surface tension for fast penetration, it frees frozen parts, displaces moisture, and saves time and materials. Safe for metal, alloys, rubber, and most painted surfaces. Not for use on electrical equipment or machinery in operation.

Part Number	Color	Operating Temp.	Sale Unit Qty	Standard Qty	Master Qty
6030	Light Amber	40F° - 100°F	12	1	12

General Purpose Silicone Lubricant

General Purpose Silicone Lubricant insulates, prevents sticking and freezing, and repels water in order to waterproof ignition systems. It leaves a clear, dry film that won't transfer to surfaces, with a slower drying time for deep penetration into rubber, rejuvenating old rubber and weather stripping. Safe for most plastics, it's perfect for hinges, rollers, mountings, O-rings, insulation, slides, conveyors, locks, and more. Not for use on electrical equipment or machinery in operation.

Part Number	Color	Sale Unit Qty	Standard Qty	Master Qty
8034	Clear	12	1	12

CHEMICALS & TAPE
CHEMICAL PRODUCTS | CABLE TIES

Dark Cutting Oil

Dark Cutting Oil is specially formulated for threading steel and cast iron and is ideal for cutting ferrous alloys and materials. Fortified with a chlorinated additive, it acts as a pressure agent, increasing tolerance for alloyed or hard-grained pipe. Note that this contains active sulfur, which may stain nonferrous materials such as copper, brass, and stainless steel.

CO4	1 gallon	4	1	4

Sound and Air Transmission Barrier Pads

Sound and Air Transmission Barrier Pads (1/8" x 6" x 8") are permanently soft, nondrying pads that are used to deaden sound in electrical outlet boxes. They can be formed into pads, tape, and beads to provide a moisture-tight seal from the area.

Part Number	Color	Standard Qty
68	Gray	100

Duct Seal

Duct Seal is used to seal around gaps and holes to protect against dust, moisture, and drafts. Common applications for use include electrical boxes, flashings, and service masts. It is manufactured from a non-toxic, non-corrosive material that can easily be shaped by hand to any form.

Part Number	Size	Standard Qty
LHD1	1 lb	50
LHD5	5 lb	10

Underwriters Laboratory (UL Listed) File No: R14721. Refer to official UL listings for applicable product sizes and specifications.

ABS and PVC Cements & PVC Pipe Primer

ABS and PVC Cement, used in conjunction with PVC Primer, provides strong, reliable bonding for conduit and non-pressure applications across all conduit schedules and classes up to 6" in diameter. PVC Primer acts as a water-thin cleaner and pre-softener to ensure optimal joint strength, making it suitable for all types, classes, and schedules of PVC pipes and fittings. Available in clear or gray and in 16 oz or 32 oz cans, this combination is ideal for a wide range of electrical and construction projects.

Handi-Foam Expanding Sealant

Handi-Foam Expanding Sealant is a moisture-cure polyurethane foam. It is used to seal, bond, retrofit, insulate, and deaden sound in electrical, plumbing, air-conditioning, and refrigeration applications. It is specifically designed to be dispensed as a bead for filling cracks. Note that substrates must be clean, firm, and free of loose particles and dust.

HF340	White	12	1	12

Underwriters Laboratory (UL Listed) File No: R13919. Refer to official UL listings for applicable product sizes and specifications.

Fireblocking Handi-Foam

Fireblocking Handi-Foam is a moisture-cure, low-pressure, one-component polyurethane foam sealant designed to seal, fill-bond, and stop air infiltration in areas where fireblock product is required. It has a recognizable orange color, allowing inspectors to easily identify the use of an approved fireblock product for Type V residential construction.

Part Number	Color	Sale Unit Qty	Standard Qty	Master Qty
HFB12	Orange	12	1	12

Underwriters Laboratory (UL Listed) File No: R13919. Refer to official UL listings for applicable product sizes and specifications.

Fire Stop Caulking Compound

Fire Stop Caulking Compound is a water-based, non-sag sealant for fire-rated, acoustic, and smoke sealing in construction joints and through-penetrations. Easy to apply and retrofit, it cures to an elastomeric seal that accommodates movement and prevents the spread of fire, smoke, hot gases, and water. It requires no dilution or mixing, making it simple to use.

Barricade Tape

Barricade Tape is a 3 mil, nonadhesive, lightweight polyethylene tape used to restrict entry into hazardous areas. It meets OSHA 1910.144 for marking physical hazards and is manufactured with a continuous warning across the entire length of the tape.

Underground Warning Tape

Underground Warning Tape is used to identify buried utility lines, pipes, cables, and conduits. It is a 4 mil, nonadhesive polyethylene tape with a printed continuous warning that is resistant to alkalis, acids, and other soil components. For proper installation, place underground tape 12"-18" below ground level and 12" directly above buried pipes, cables, or conduits before backfilling. Meets APWA color code standards.

Pull Line Measuring Tape

Polyester Pull Line Measuring Tape is a pre-lubricated, lightweight, and abrasion-resistant pulling line that is designed for high temperature and high tensile strength cable-pulling applications. It is printed with easy-to-read sequential footage markings and is manufactured to provide a low coefficient of friction to help minimize duct melting. It easily pulls and installs wire and fiber optic cables within PVC and HDPE ducts.

Part Number	Length	Tensile Strength	Standard Qty	Master Qty

3-in-1 Polyester Pull Line

3-in-1 Polyester Pull Line provides line threading, tape measuring, and winch line all in one product. It is a pre-lubricated polyester pull line that will reduce friction levels and eliminate duct cutting. It is printed with easy-to-read sequential footage markings. With a center pull dispensing pail, the lightweight tape is easily blown through conduit or inner ducts and has a lower elongation, which reduces pulling time.

Part Number	Width	Length	Tensile Strength	Standard Qty
PMT1300	5/8"	1300'	1800 lbs	1
PMT4500	1/4"	4500'	400 lbs	1

Pull Line

Polypropylene Pull Line is a 2-ply, rot- and mildew-resistant pull line that is used to pull rope through conduit. It comes packed in a contractor-friendly center pull dispensing pail or in a general-purpose carton box and can be used with power fishing systems for faster and easier pulling.

Part Number	Width	Length	Working Load	Tensile Strength	Standard Qty
6502	1/8"	6500'	20 lbs	200 lbs	1
P 6502P	1/8"	6500'	20 lbs	200 lbs	1
6502PZ	1/8"	6500'	20 lbs	200 lbs	1
P 2203P	1/4"	2200'	50 lbs	500 lbs	1

Conduit Measuring Tape

Conduit Measuring Tape is polyester yarn used to fish and measure conduit runs in one operation. It is sequentially marked in one-foot increments and is manufactured from a strong, abrasion-resistant, waterproof polyester. It is rot- and mildew-resistant, can be fished into conduit, and can remain for an extended period of time for future use.

Part Number	Width	Length	Tensile Strength	Standard Qty	Master Qty
3000	3/16"	3000'	140 lbs	1	4

Pull Rope

Polypropylene Pull Rope is a strong, lightweight rope that is designed to pull wires through conduit and pipe. It is rot-proof and unaffected by water, oil, gasoline, marine growth, and most chemicals.

Part Number	Width	Length	Working Load	Tensile Strength	Standard Qty
3625	3/16"	250'	72 lb	750 lbs	1

CHEMICALS & TAPE

PULLING | FISHING

Nylon Fishing Line

Nylon Fishing Line is used to fish cable through conduit. It has a center feed for fast payout and can be pulled into the conduit run and left there to add future wires. It has excellent resistance to rot, abrasion, mildew, marine growth, petroleum products, and most chemicals.

Part Number	Color	Length	Tensile Strength	Standard Qty	Master Qty
N85	Natural	2150'	85 lbs	1	12

Heavy Duty Nylon Fishing Line

Heavy Duty Nylon Fishing Line is used to fish cable through conduit. It has excellent resistance to rot, abrasion, mildew, marine growth, petroleum products, and most chemicals.

Pink Twisted Nylon Twine

Pink Twisted Nylon Twine is used to fish cable through conduit. It has excellent resistance to rot, abrasion, mildew, marine growth, petroleum products, and most chemicals.

Part Number	Color	Length	Tensile Strength	Standard Qty	Master Qty
N18P	Pink	1100'	120 lbs	1	12

General Duty Wire Reel Caddies

General Duty Wire Reel Caddies are designed with versatile configurations to meet contractor needs. Options include a general wire dolly, a dolly with an integrated hand spool, and a foldable wire rack model featuring a unique hinge design for flat, compact transport. Equipped with 10" semihard rubber tires, they provide smooth handling on any surface and support up to 650 pounds. Perfect for transporting and dispensing reels of building wire, coaxial, multiconductor cables, and more.

Part Number	Overall Width	Overall Height	Overall Depth	Load	Standard Qty

DD106A	16-1/4"	48-1/2"	13-1/2"	650 lbs	1

Quick Leader

The Fish Tape Quick Leader is manufactured for use with 1/8"-wide steel fish tapes. It is capable of pulling up to 500 pounds and is designed for maximum flexibility, ensuring that even the tightest and hardest-to-reach areas are accounted for.

Part Number	Standard Qty	Sleeve Qty	Master Qty
QL12	1	10	100

Power Fishing Pistons

Power Fishing Pistons are used with a power vacuum or blower to pull line through a conduit run. They are manufactured with a metal pulling eye at both ends for easy installation and feature a tough foam piston that will clean its own path. When installed, the Power Fishing Piston will provide an air-tight seal in the conduit.

Wire Hand Totes

Wire Hand Totes are available in 8-spool and 12-spool configurations, offering a lightweight, durable solution for organizing and transporting wire. They feature a powder-coated yellow finish for durability and adjustable hitch pin clips for flexibility. Constructed with 5/8" and 1" high-strength steel tubing, the robust handles ensure dependable performance on any job site.

DRILL BITS

High Speed Steel Drill Bits

High Speed Steel Drill Bits are suitable for use in steel, steel forging, cast iron, and other work materials. They are roll-forged and have a 135° split point for optimal drilling. Sold on cards or packs of 12.

Tip Bits

Tip Bits are a heavy-duty step bit with a replaceable tip for longer-lasting life. Each bit is manufactured from M2 high-speed steel and coated with titanium and cobalt for tougher and cooler cutting. Fitted with a removable, plier-tight tip, this unique feature extends the life of the core of the bit by simply replacing the tip.

Ship Auger Bits

Ship Auger Bits are versatile, high-quality boring bits for use in wood. Featuring a self-feeding screw-point tip, they pull through wood with minimal effort. Their aggressive design and sharp cutting edges easily handle nails, while heat treatment enhances durability. Two recesses allow for extensions, adding flexibility for various applications.

Flex-A-Bits

Flex-A-Bits are designed for drilling in hard-to-reach areas within walls or tight spaces. They feature a flexible spring steel shaft and a permanently brazed self-feeding point for effective drilling in confined areas. A tapered back allows for easy retraction, and a small hole in the tip enables wire and cable pulling. The Flex-A-Guide-Tool helps position the Flex-A-Bit when drilling.

Variable Pitch Hole Saws

Variable Pitch Hole Saws are used to cut stainless steel, iron, pipe, wood, and plastic. They are manufactured from a bi-metal cobalt construction and feature a cobalt cutting edge that will resist shock and strippage. They will cut to depths of 1-1/2" and are shatterproof.

Hole Saw Kits

Hole Saw Kits are available in various sizes and configurations to meet diverse project needs. Each kit includes multiple bi-metal cobalt hole saws, featuring a cobalt cutting edge for enhanced durability. The shock-resistant, shatterproof teeth are designed to resist stripping, ensuring reliable performance. These hole saws are suitable for cutting through stainless steel, iron, pipe, wood, and plastic. Each kit also includes all the necessary arbors for convenient and efficient use.

Kan-Cut Carbide Recessed Lighting Hole Saws

Kan-Cut Carbide Recessed Lighting Hole Saws are durable, one-piece tungsten carbide grit holesaws with a continuous grit edge for cutting abrasive materials like stucco, lath, and plaster. They also handle drywall, plywood, acoustic tile, and wood with ease. Their smooth cutting action reduces vibration and dust dispersal. Ideal for recessed lighting, plumbing, electrical work, vent installation, and more.

Carbide Tipped Hole Cutters

Carbide Tipped Hole Cutters are designed for cutting holes in mild steel, stainless steel, iron, copper, and brass sheet metal. They feature a built-in drill flange to prevent over-penetration, ensuring safe and precise cuts. A replaceable pilot bit is included to help guide the cutter, making drilling and hole-making easier and more accurate.

Knockout Cups, Dies, and Sets

The Replacement Cups & Dies feature laser-etched part numbers and size identification for easy reference. Designed for use with Dottie's punch tools, they incorporate a 3-point design to prevent slug binding in the cup and are dual-rated for both steel and stainless steel. The innovative design reduces torque by 50% and is compatible with other major tool brands.

Straight Squeeze Connectors.....	p. 55
Universal Snap-In Stud Bushings.....	p. 57
Wall Plate Insulation Gaskets.....	p. 57
Weatherlight Hubs.....	p. 54
Wiring Device Spacers & Shims.....	p. 57

Fastener Kits

Bolt, Nut & Lock Washer Kit.....	p. 39
Concrete Screw Anchor Kit.....	p. 38
Hex Nut Kit.....	p. 39
Machine Screw Kits.....	p. 38
Metal Piercing Screw Kit.....	p. 39
Phillips/Slotted Round Head Machine Screw, Hex Nut, & Lock Washer Kit.....	p. 39
Self Drilling Drywall Screw Kit.....	p. 38
Self Drilling Screw Kits.....	p. 38
Sheet Metal Screw Kits.....	p. 38
Stove Bolt Screw Kits w/ Hex Nut.....	p. 39
Terminal Kit.....	p. 39
Wall Plate Screw Kits.....	p. 38
Washer Kits.....	p. 39
Wood Rocket Kit.....	p. 38

Fixture Accessories

Eye Bolts.....	p. 25
Fixture Hangers.....	p. 24
Flat Hanger Screws.....	p. 25
Hanger Screw Installation Tool.....	p. 25
Jack Chain.....	p. 24
S Hooks.....	p. 24
Screw Eyes.....	p. 25
Screw Hooks.....	p. 25
U-Bolts.....	p. 25

Grounding

Armored Ground Clamps.....	p. 58
Bare Ground Clamps.....	p. 58
Bronze Hubs.....	p. 58
Crimp Sleeves.....	p. 59
Ground Clamps w/ Hub.....	p. 58
Ground Clips.....	p. 59
Ground Pigtails.....	p. 59
Ground Rod Clamps.....	p. 58
Ground Rod Drivers.....	p. 59
Ground Rods.....	p. 59
Insulated Ground Bushings.....	p. 59

Hangers & Strut Fittings

Angle Fittings.....	p. 49
Beam Clamps.....	p. 44
Channel Nuts.....	p. 48
Conduit Hangers.....	p. 45
Flat Plate Fittings.....	p. 49
Hook On Straps.....	p. 42
Offset Strut Straps.....	p. 45
Plastic Coated Pipe & Tube Hanger.....	p. 42
Post Bases.....	p. 49
Square Washers.....	p. 49
Strut Clamps.....	p. 45
U & Zee Fittings.....	p. 49
U-Bolt Beam Clamps.....	p. 49

Hanging Systems

Ceiling Wire.....	p. 35
Concrete Rod Hangers.....	p. 34
Dual Rod Hangers.....	p. 34
Hanger Bolts.....	p. 33
Metal Rod Hangers.....	p. 34
Telescoping Pole Tool & Accessories.....	p. 35
Threaded Rod Spikes.....	p. 33
Wood Rod Hangers.....	p. 34

INDEX

Heavy Duty Anchors

Concrete Screw Bolts.....	p. 32
Drop In Anchors.....	p. 33
Lag Shields.....	p. 35
Mini Drop-In Anchors.....	p. 33
Sleeve Anchors.....	p. 30
Wedge Anchors.....	p. 32

Installation Tools

Carbide Tipped Hammer Drill Bits.....	p. 31
Concrete Screw Anchor Installation Kit.....	p. 31
Hanger Bolt Installation Tools.....	p. 33
Machine Screw Anchor Setting Tools.....	p. 35
Rod Hanger Installation Tools.....	p. 34
Drop-In Anchor Setting Tools.....	p. 33

Jobsite Cleanup

Contractor Clean-Up Bag.....	p. 66
Multi-Purpose Tuff Towels®.....	p. 66
White Knit Rags.....	p. 66

Light Duty Anchors

Concrete Screw Anchors.....	p. 31
Conical Plastic Anchors.....	p. 28
Double Expansion Anchors.....	p. 35
Machine Screw Anchors.....	p. 35
Multi Grip Plastic Anchors.....	p. 28
Nylon Button Head Drive Anchors w/ Pin.....	p. 29
Nylon Toggle Anchors.....	p. 29
Nylon Wall Driller.....	p. 28
Ribbed Tubular Plastic Anchors.....	p. 28
Toggle Bolts.....	p. 30
Wall Drive Anchors.....	p. 29
Wall Grip Anchors.....	p. 29
Wing Conical Plastic Anchors.....	p. 28
Zamac Alloy Anchors.....	p. 29
Zamac Alloy Wall Driller.....	p. 28

Nuts

Hex Nuts.....	p. 22
Rod Coupling Nuts.....	p. 24

Paints, Aerosols, & Crayons

Clear Coat Specialty Marking Paint.....	p. 62
Construction Marking Paint.....	p. 62
Epoxy Insulating Protective Coating.....	p. 63
Galvanize Coating.....	p. 62
General Purpose Silicone Lubricant.....	p. 63
Gray Multi Purpose Primer.....	p. 62
Lumber Crayons & Holder.....	p. 65
Marking Paint Applicator.....	p. 62
Multi Purpose Wet Lubricant.....	p. 63
Off-Line Contact Cleaner.....	p. 63
Insulating Varnish.....	p. 63
Rust Proof Paint.....	p. 62
Water Based Cutting Oil.....	p. 63
White Spray Chalk.....	p. 62

Pipe Supports

Floor Flanges.....	p. 45
Pipe Supports.....	p. 46

Safety Products

Disposable Ear Plugs.....	p. 85
First Aid Kit.....	p. 85
General Purpose Dust Masks.....	p. 85

Saws, Blades, & Knives

Knife & Tool Sharpener.....	p. 84
Lockback Utility Knife.....	p. 81
PVC Ratcheting Pipe Cutter.....	p. 81
PVC/ABS Pipe Saw.....	p. 81
Recipoblades.....	p. 81
Utility Saws.....	p. 81

Screwdrivers, Bits, & Extensions

Compact Combo Insert Bit Kit.....	p. 75
HVAC 15 in 1 Multi-Bit Screwdriver.....	p. 82
Insert Bits.....	p. 74
Magnetic Bit Holders.....	p. 74
Magnetic Hex Drivers.....	p. 74
Megapro Replacement Bits.....	p. 83
Multi-Drive Screw Guide Bit Holder.....	p. 83
Original 15 in 1 Multi-Bit Screwdriver.....	p. 82
Power Bits.....	p. 75
Precision 24 in 1 Multi-Bit Screwdriver.....	p. 82
Ratcheting 13 in 1 Multi-Bit Screwdriver.....	p. 82
Shaftlok 15 in 1 Multi-Bit Screwdriver.....	p. 82
Stainless Steel 15 in 1 Multi-Bit Screwdriver.....	p. 82
Socket Adapter Extensions.....	p. 75
Tamperproof 15 in 1 Multi-Bit Screwdriver.....	p. 82
Tamperproof 2 - 15 in 1 Multi-Bit Screwdriver.....	p. 82
Tamperproof Insert Bits.....	p. 74
Tamperproof Screwdrivers.....	p. 83
Wire Nut Driver Bit.....	p. 84

Screws

Drywall Screws.....	p. 18
Flat Head Machine Screws.....	p. 8
Framing Screws.....	p. 17
Ground Screws.....	p. 10
Hex Washer Head Sheet Metal Screws.....	p. 14
High Hex Head Self Drilling Screws.....	p. 17
K-Lath Metal Piercing Screws.....	p. 15
Lag Screws.....	p. 19
Pan Head Sheet Metal Screws.....	p. 12-13
Round Head Machine Screws.....	p. 9-10
Self Drilling #5 Point Screws.....	p. 17
Self Drilling Drywall Screws.....	p. 17
Self Drilling Framers Screws.....	p. 17
Self Drilling Screws.....	p. 16
Slotted Hex Washer Head Metal Piercing Screws.....	p. 14
Slotted Hex Washer High Head Metal Piercing Screws.....	p. 15
Stainless Steel Phillips Pan Head Machine Screws.....	p. 10
TamperProof Machine Screws.....	p. 11-12
Truss Head Machine Screws.....	p. 9
Wall Plate Screws.....	p. 11
White Slotted Hex Washer Head Register Screw.....	p. 15
White Phillips Oval Head Register Screw.....	p. 15
Wood Screws.....	p. 18-19

Staples & Plates

Plastic Insulated Staples & Straps.....	p. 43
Plate Straps.....	p. 42
Safety Plates.....	p. 42
Staples.....	p. 43

Straps & Stampings

Black Annealed Steel Tie Wire.....	p. 43
Galvanized Steel Tie Wire.....	p. 43
Nail Straps.....	p. 42
One Hole Straps.....	p. 44
Plumber's Tape.....	p. 42
Roof Jacks.....	p. 46
Spider Plates.....	p. 43
Switch Box Supports.....	p. 43
Two Hole Straps.....	p. 44

Threaded Rod..... p. 24

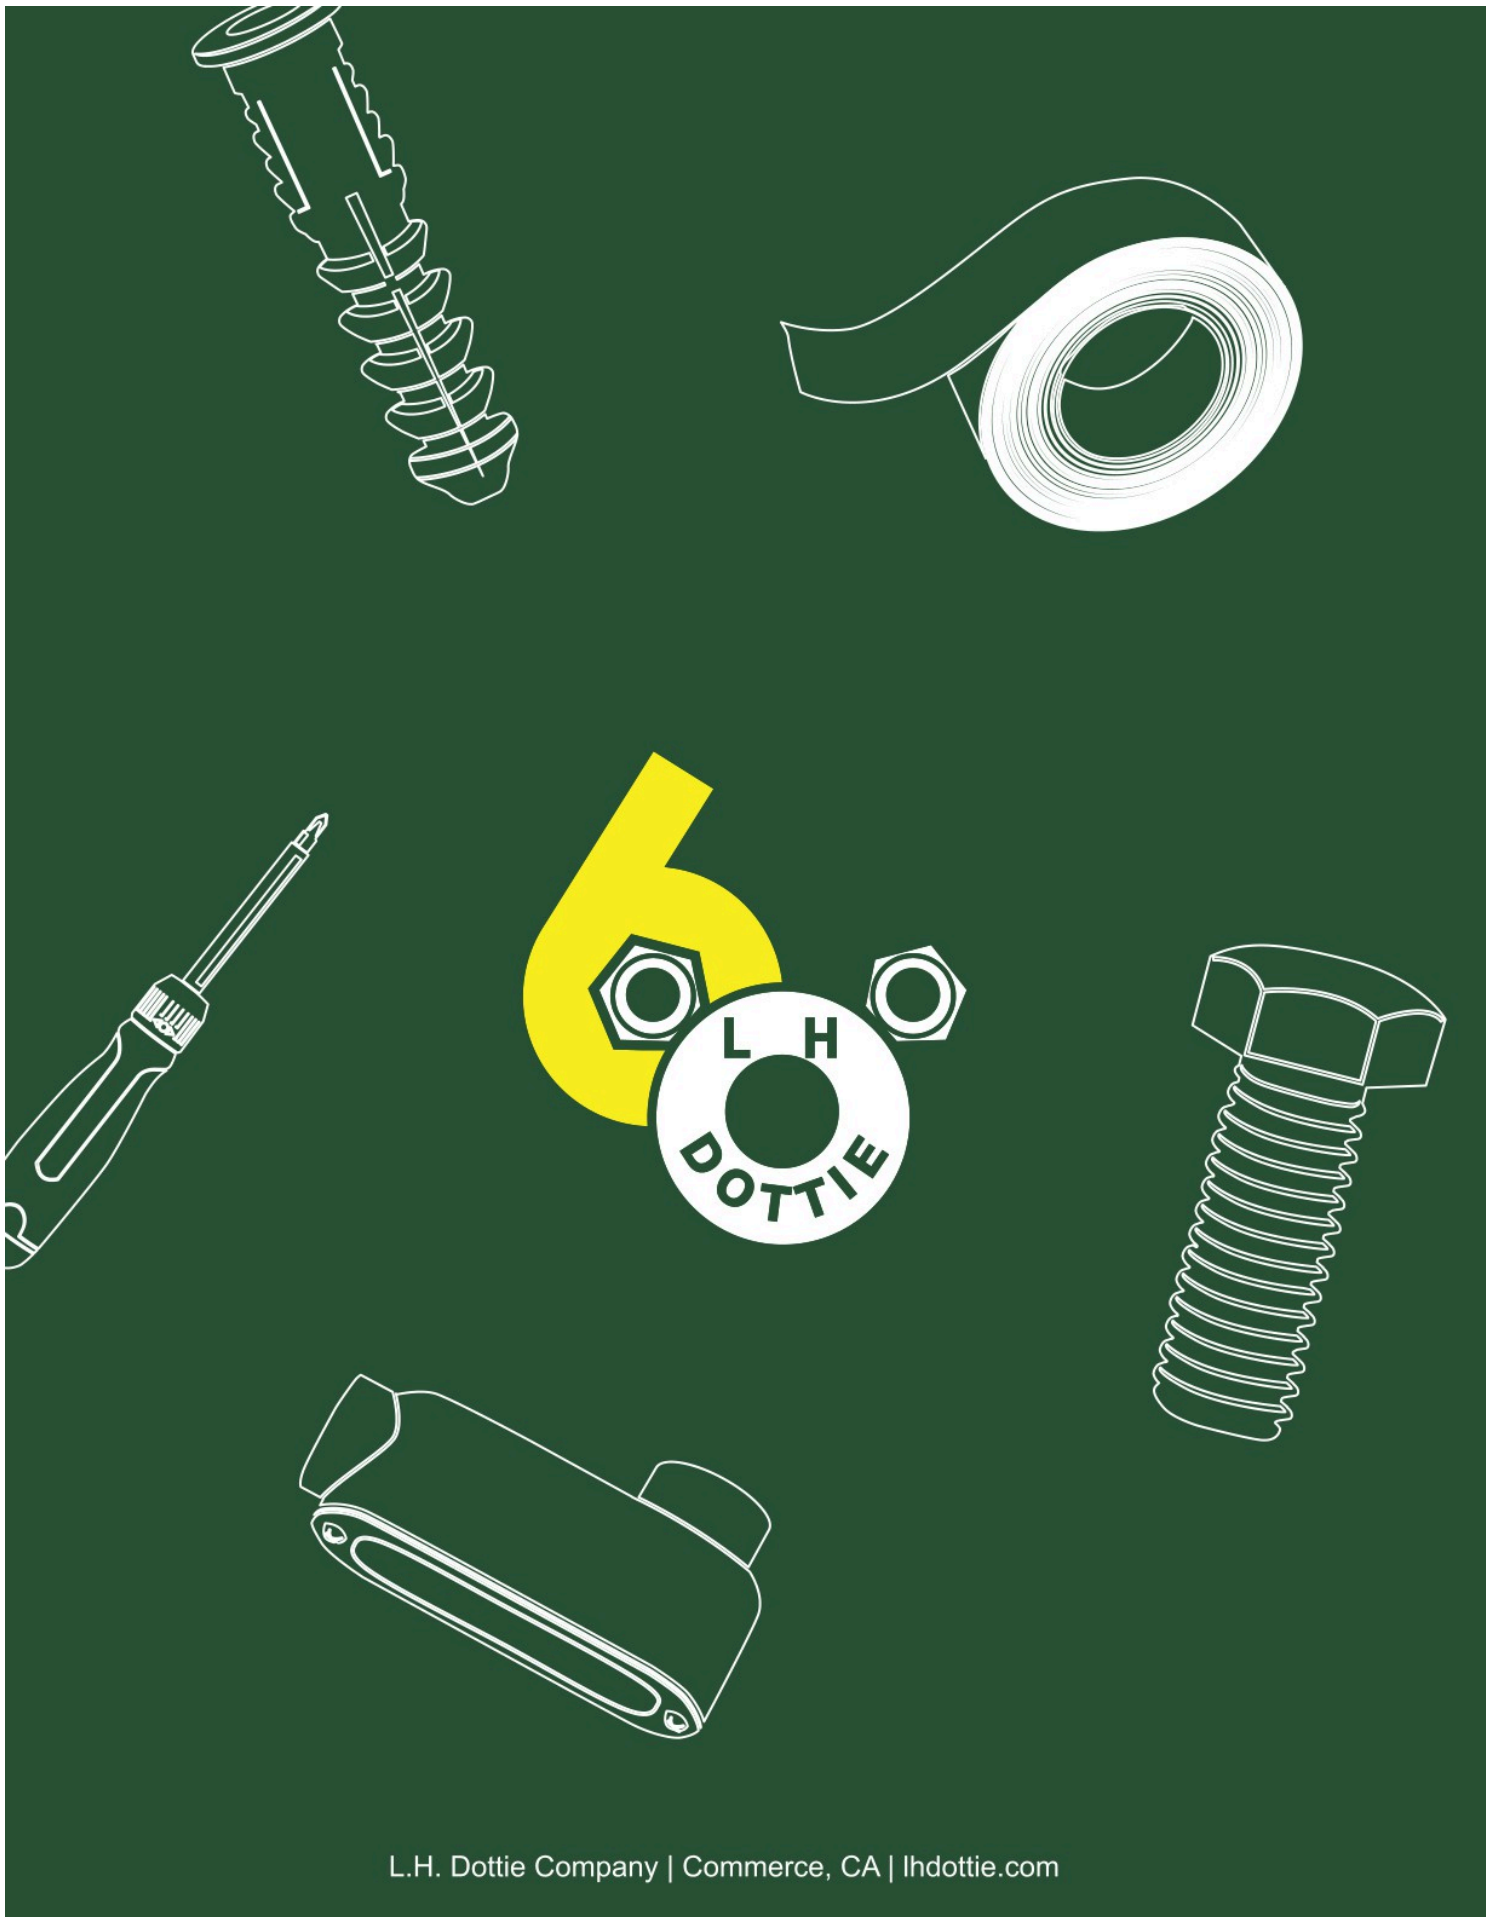

Washers

Fender Washers.....	p. 23
Flat Washers.....	p. 22-23
Lock Washers.....	p. 23

Wire Marker Books..... p. 65

Work Gear

4 Mil Nitrile Disposable Gloves.....	p. 85
8 Mil Nitrile Disposable Gloves.....	p. 85
LevTech Mag Dog Levels.....	p. 84
Nylon Web Straps.....	p. 84
Shoe Covers.....	p. 85
Tuff Gear® 55 Pocket Workstation Backpack.....	p. 84
Tuff Gear® Pro Tool Belt.....	p. 84
